

Microbrewery BROVAR was established by a Russian businessman Igor Saenko in 2008 in the picturesque suburb of St. Petersburg, in the village of Vaskelovo (Vaskela), at the farmstead, surrounded by centuries-old pine trees overlooking Lembolovskoe lake (Lempaalajärvi).

The uniqueness of the brewery is that it revived the family tradition of brewing in the original recipe, which reaches back into the depths of the centuries and has been interrupted in 1917. Traditionally, for BROVAR beer manufacturing, in accordance with the German law of brewing purity of 1516, the following ingredients are used only:

- water, which is a unique natural phenomenon, while it is extracted from 175 meters deep artesian well within "Lembolovsky fault" or granite layer and is ideal for brewing;
- high-quality barley and wheat malt from Germany, Belgium and the Czech Republic, from light to burnt;
- finely-aromatic hops "Žateckij červenák" from the Czech Republic;
- live yeast culture of the European yeast banks.

High-quality «manual» brewery equipment from Czech Republic allows us to use both infusive (German) and doubleboiling (Czech) types of mash preparation and their combination, which allows to emphasize the varietal characteristics of the beer.

The brewery manufactures for connoisseurs ecologically pure product: non-filtered non-pasteurized Premium class beer of registered trademark BROVAR

## BROVAR ALE

traditional light old Irish Ale of hot fermentation with refreshing taste and soft rich malt flavour, balanced with light bitterness of aromatic hops, of intense amber color.

The initial original wort 12,0%. Volume fraction of alcohol not less than 4,5%.

Ingredients: water, barley malt, hops, yeast. The energy value of 46 kcal per 100 g of beer.

## BROVAR LAGER

a light lager of cold fermentation, popular around the world, the so-called pilsensky type, with balanced taste of good fermented malt and a light scent of pleasant hop bitterness.

The initial original wort 12,0%. Volume fraction of alcohol not less than 4,5%.

Ingredients: water, barley malt, hops, yeast. The energy value of 46 kcal per 100 g of beer.

Certificate of State Registration № RU.47.01.05.018.E.000332.09.11 of 21/09/2011

Russian Federation State Standard ГОСТ P 51174-2009,

Technical Instruction ГОСТ P 51174-2009-001

Storage life is 30 days since the date of kegs filling at  $t^{\circ} +2C - +4C$ .

Artesian borehole № 17-И, License ЛОД №02567 ВЭ.

Manufacturer: entrepreneur Igor G. Saenko

Address: 188695, Leningrad region, Vsevolozhsky district, the village of Vaskelovo, leningradskoe highway, 44-d.

We supply the beer in 30l kegs (fitting G) on CIP (Carriage and Insurance Paid to) warehouse of the buyer conditions. Right now we make deliveries to Finland once in two weeks.

The production of beer types by the customer's request is possible.
